Device Warranty Policy

Coverage

Devices sold by Northfield Digital are covered for 12 months from the purchase date against manufacturing defects.

Claim readiness

A claim packet needs the serial number, the purchase date, a description of the fault and proof of purchase. The claims team reviews complete packets.

Limits

This service prepares the packet and hands it to the claims team. It does not approve or submit warranty claims to a manufacturer.

Synthetic, fictional policy for a demonstration. Document key: warranty-policy.
